Digital transformation for Social Protection arrangements?

Makes social protection more
effectively

Negative externality for
formal social protection's
sustainability

[At glance]

New trend: Re-informalization economy (?)

Precariat issues

**Changing employee &
employer relationship**

**'Tax state fiscal capacity extraction and
the capacity of the labour market
regulation' (Liu & Wang, 2018: 2)**

imagine

**Could it be that
developed countries
will feel the impact of
digital transformation
more??**

In light of in many developed countries,
particularly in the Western countries, they
have experienced with transformation
toward individualism as a result of family
and community dislocation since the
industrial revolution period

imagine

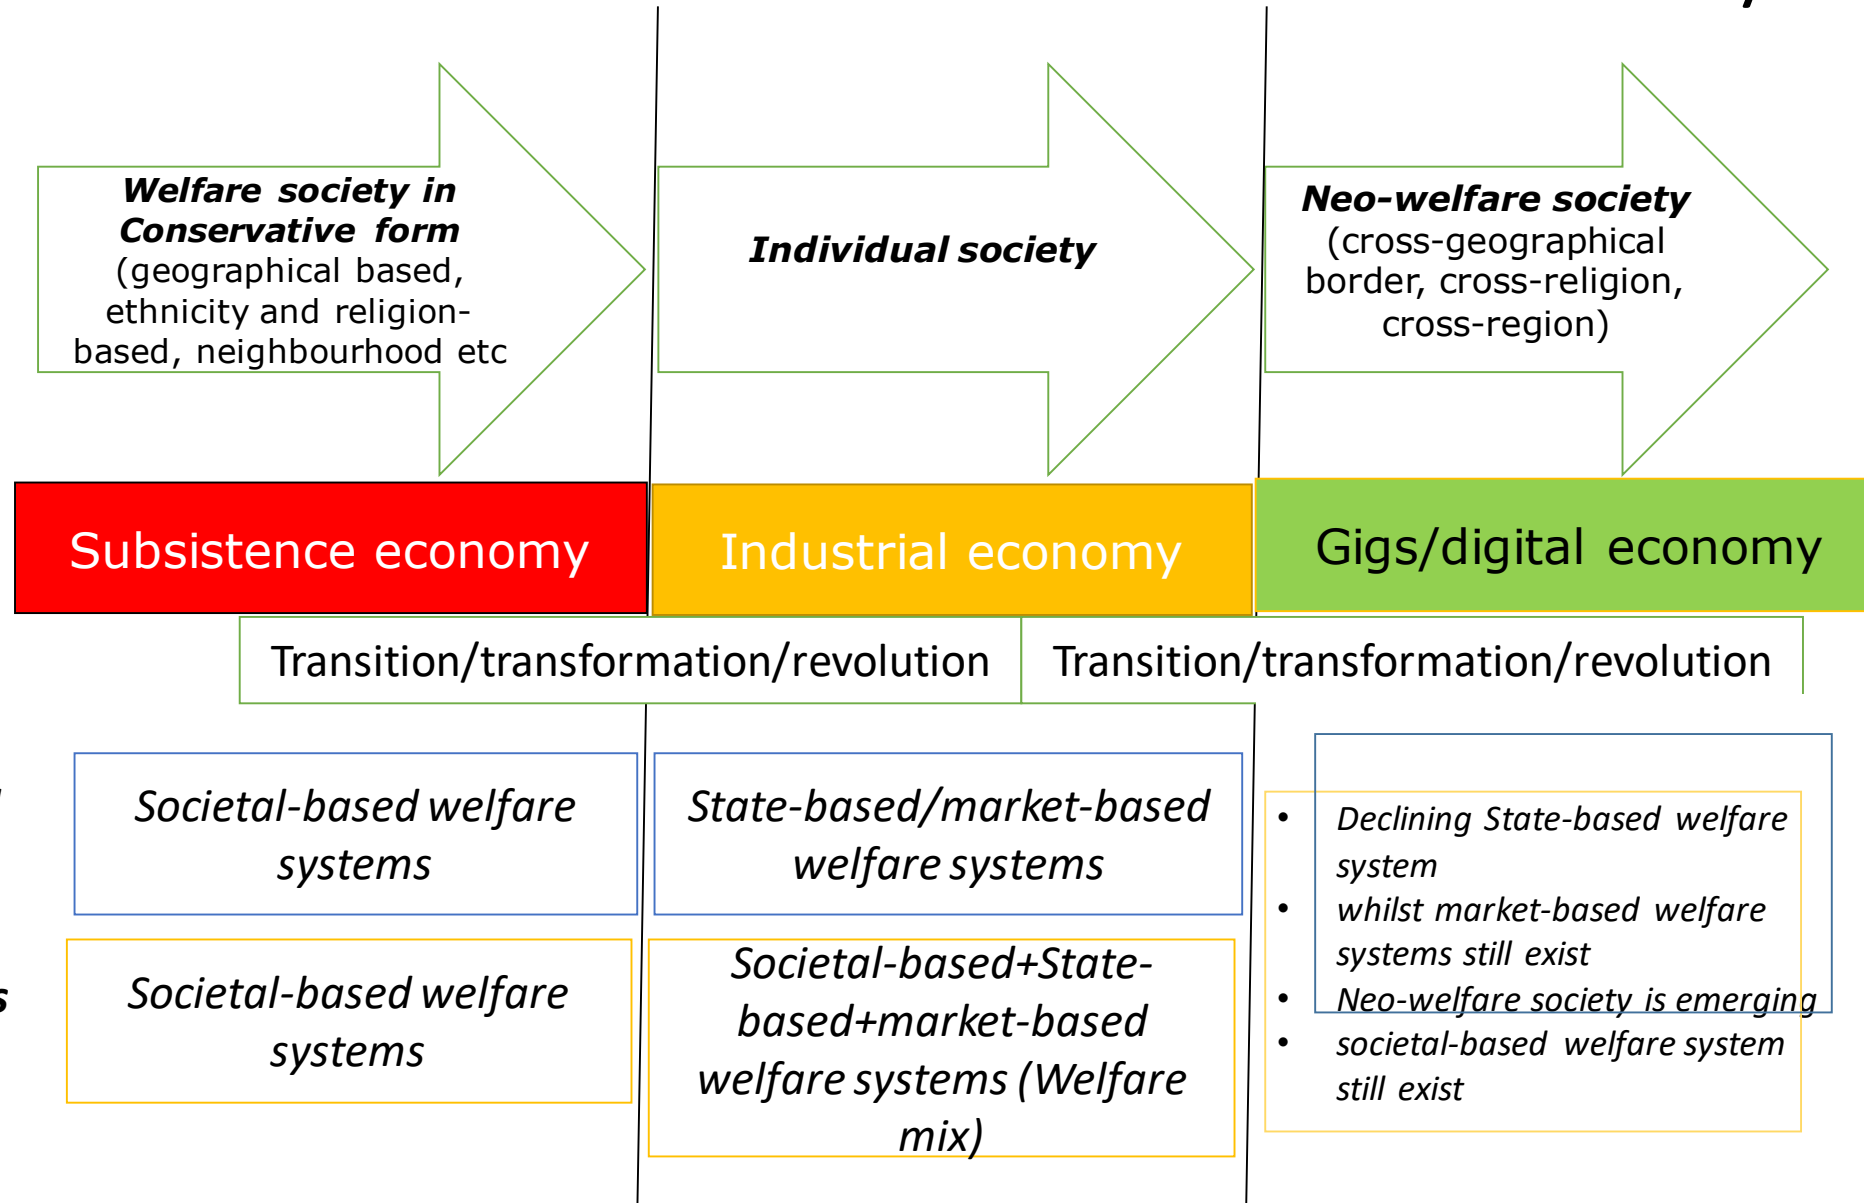

**what about
developing countries?**

To my mind, in developing countries, the advent of the digital transformation effect can be overcome through kinship-based that still hold a prominent role in helping the people to cope with social risks.

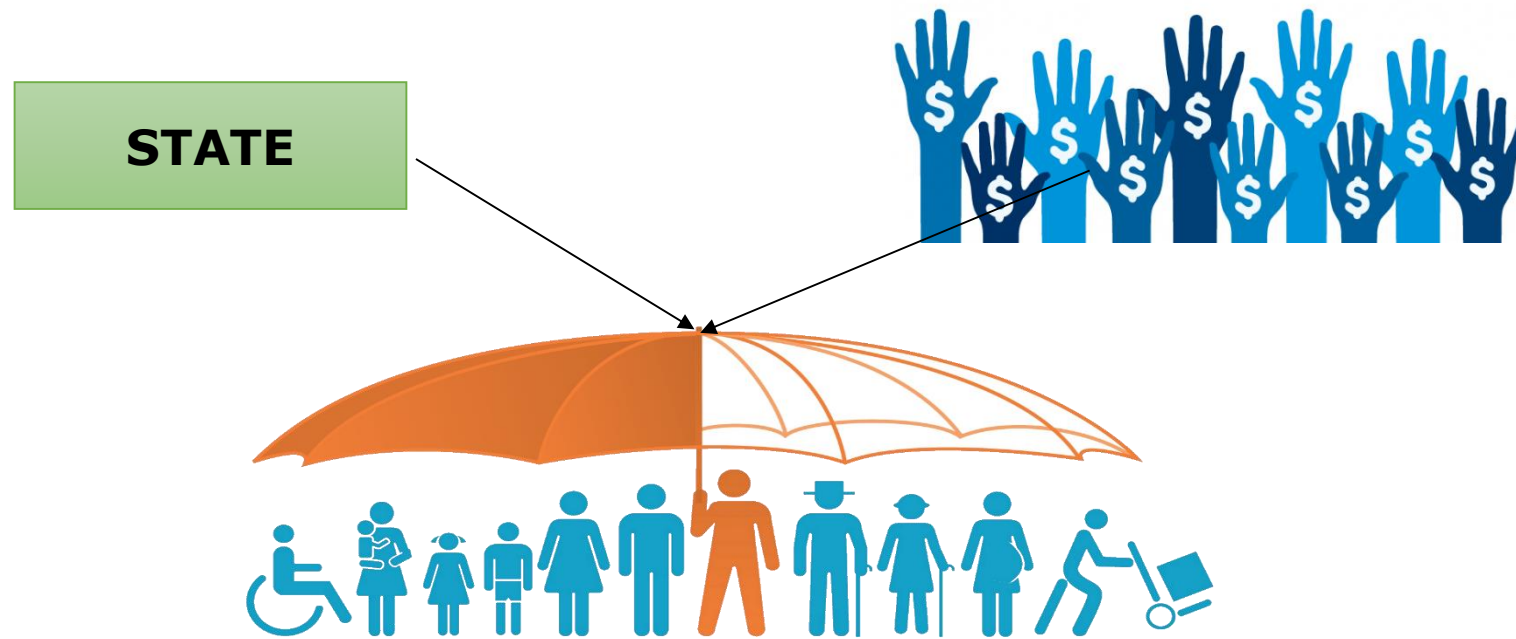

The advent of neo-welfare society?

the welfare configuration is centered through local communities and nonprofit organizations as the subject.

Reintroducing Welfare society as social protection paradigm in digital economy?

Research agenda in near future?

- To what extent the digital transformation will weakens the state-based social protection?
- What the new risk might arised from digital transformation, compared to the pra-digital revolution? How far the exisiting social protection responding the new risk?
- ?????????

Other Policy recommendation in near future

- Renewal fiscal policy regulation for controlling financial circulation in digital economy
- Renewal the existing regulation to regulating employee-employer relationship to creating the beneficial relationship and reducing new-exploitation
- Mapping a various new risk that might arise from the digital economy activity
